FARM GUARD

Your Ultimate Crop Protection Solution

Protect Your Farm
from Wildlife
Intrusions

FARM GUARD

FARM GUARD

Farming is a demanding occupation, and protecting crops from wildlife intrusions is one of the most significant challenges faced by farmers today. Wildlife such as deer, bears, boars, rabbits, elephants, and birds can cause extensive damage to farm fields, leading to substantial crop losses, reduced yields, financial setbacks, and increased labor costs.

Farm Guard is an innovative artificial intelligence wildlife repeller and a sustainable solution designed to protect your farm from these threats, ensuring the safety and productivity of your fields

HOW **FARM GUARD** PROTECTS!!!

Once Farm guard is installed in a particular area, the place will be always under surveillance.
When an intruder enter in to the area, then the device will produce an annoying noise and lighting until it make the animal scary. It prevent them from entering to the area. By implementing farm field protectors, farmers can protect their crops, reduce losses, and maintain a healthy and profitable farm.

By implementing Farm Guard, you can protect your crops, reduce losses, and maintain a profitable and productive farm. Unlike the potentially harmful electric wired systems available in the market, Farm Guard prioritizes user-friendliness

KEY FEATURES OF FARM GUARD

Choose Your Level of Protection

FARM GUARD - **VERSION**

ESSENTIAL SECURITY

01

Perfect for farmers seeking reliable, cost-effective protection, **Farm Guard Version 1** delivers essential features in a compact and user-friendly package

Key Features:

Dual Lights, Speaker, and Sensors

Two lights, a speaker, and sensors for effective detection and deterrence.

Manual & Automatic Operation Modes

Flexibility to control operations based on your farm's needs

Various Light and Sound Patterns

Multiple settings to scare away animals before they reach your crops

Animal Repelling Technology

Specifically designed light and sound combinations to keep wildlife at bay

24×7 Monitoring Facility

Continuous surveillance for uninterrupted protection

Long-Life Lithium Battery (40Wh Capacity)

Ensures extended operation with minimal charging needs

FARM GUARD - **VERSION 01**

ESSENTIAL SECURITY

Key Features:

Low Maintenance

Hassle-free operation with reduced upkeep

Waterproof & Durable Design

Engineered to endure harsh weather conditions

Easy Installation & Portability

Simple setup with the convenience of moving the device across different areas

Fit and Forget Mode

Set it up and let it operate autonomously, requiring no constant supervision

Night Mode & Day/Night Mode

Customizable modes to suit different operational requirements

Suitable for All Crops and Fields

Versatile protection for a wide range of agricultural settings

Eco-Friendly & Safe

Designed to be non-harmful to crops, fields, and animals

KEY FEATURES OF FARM GUARD

Choose Your Level of Protection

FARM GUARD - **VERSION**

ADVANCED **PROTECTION**

02

For those seeking comprehensive security,
Farm Guard Version 2 offers enhanced features that provide 360° coverage and high-end deterrence technology

Key Features:

Advanced Light, Speaker, and Sensor Array

Three lights, speakers, and four sensors for superior detection and deterrence

360° Monitoring

Complete coverage of your entire field to ensure no intrusion goes unnoticed

Variable Sound and Light Patterns

Customizable deterrent settings to meet specific threats

Electric Fencing Facility

An added layer of defense that safely repels wildlife while protecting livestock

Automatic & Manual Operation Modes

Flexibility to switch between manual and automated control

Night Mode & Day/Night Mode

Tailored operation modes for continuous protection

Real-Time 24×7 Monitoring

Stay connected and informed with round-the-clock surveillance

FARM GUARD - **VERSION 01**

ESSENTIAL SECURITY

Key Features:

High-Capacity Battery (90Wh)

Extended battery life with a minimum charging cycle of 2 months

Long Battery Life

Ensures uninterrupted protection over long periods

Low Maintenance

Designed for ease of use with minimal upkeep requirements

Waterproof & Highly Durable

Built to last, even in extreme weather conditions

Portable & Easy Installation

Lightweight and easy to set up, with the flexibility to relocate as needed

Enhanced Sound and Light Technology

Versatile enough to repel even the largest intruders

Suitable for All Crops and Fields

Comprehensive protection across different types of agricultural environments

Fit and Forget Mode

Autonomous operation that doesn't require constant monitoring

Eco-Friendly & Safe

Non-harmful materials ensure the safety of crops, fields, and animals an eco-friendly solar panel, reducing environmental impact

WHY CHOOSE **FARM GUARD ?**

Farm Guard isn't just a device—it's a comprehensive solution for modern farmers who value both security and sustainability. With our two versions, you can select the level of protection that fits your needs, ensuring that your crops and livestock are always safe from unwanted intrusions.

BENEFITS OF FARM GUARD ?

COST SAVINGS
Minimizing crop damage and loss translates to significant cost savings, enhancing profitability

ECO-FRIENDLY
Non-lethal deterrents reduce the need for harmful pesticides, promoting sustainable farming practices

COMPREHENSIVE PROTECTION
Adaptable to different types of crops and farm sizes, providing all-around security

PEACE OF MIND
With real-time alerts and integrated alarms, Farm Guard enhances the overall security of your farm, giving you peace of mind

EASY INSTALLATION & CUSTOMIZATION
Quick setup and adjustable features to fit different types of crops and field sizes.

HIGHER YIELDS & PRODUCTIVITY
Protecting crops from wild animal damage results in higher yields and improved farm productivity

SAFETY FIRST
Ensures the safety of both wildlife and farm personnel with non-toxic repellents and safe-to-handle materials

DURABILITY & WEATHER RESISTANCE
Constructed from high-quality materials to withstand various environmental conditions such as rain, wind, and UV exposure

IMMEDIATE RESPONSE
Equipped with an advanced alert system, Farm Guard notifies responsible persons immediately when animals breach the perimeter, ensuring quick response and minimal damage

ADVANCED DETERRENCE TECHNOLOGY
Ultrasonic sound emitters, motion-activated lights, and electric fencing keep a wide range of wild animals away from your fields

VERSATILE APPLICATION
Ideal for protecting both farm fields and forest borders from wildlife intrusions

ENERGY EFFICIENT
Powered by long-lasting batteries and solar panels, minimizing energy consumption.

LOW MAINTENANCE
Automated systems reduce the need for human supervision and lower maintenance costs

INVEST IN FARM GUARD TODAY
AND SECURE YOUR FARM'S FUTURE!
